

# UIL Science Contest Test Format 2017-2018

The only significant formatting change for 2017-2018 concerns placement of the reference material. Based on feedback from coaches and students, the reference information will now be located on a single front-and-back page at the back of the test booklet. *After the contest start signal is given*, contestants may detach this page from the test to provide easier access.

The reference page for chemistry will always include a periodic table. Additional chemistry constants and other references may vary depending on the content of each test. The list of useful constants for physics will likely remain the same on each test.

Each test will be structured as follows:

<b>Page 1</b>	Main test cover page with instructions on procedures and scoring
<b>Pages 2-4</b>	Biology questions, numbered B1-B20
<b>Pages 5-7</b>	Chemistry questions, numbered C1-C20
<b>Pages 8-10</b>	Physics questions, numbered P1-P20
<b>Page 11</b>	Chemistry reference page, including periodic table
<b>Page 12</b>	Physics reference page
