GUIDE FOR CONTESTANTS:

Write your team number in the box in the upper left corner on ALL Run Sheets. Do not write your names or the name of your school anywhere on this sheet.

For the boxes in the right corner, you only need to fill in the **"Computer"** box if you are working in a lab setting where you need to specify which machine you are using. If you are using your own equipment, leave this box blank unless directed otherwise by the contest director. In the **"OS Version"** box, you may specify which operating system you are using (such as Windows XP or Mac OS X) if instructed to do so by the contest director.

Remember that the judges will mark only the first **OBSERVED** error. Your program may have other errors in addition to what is noted; check your work carefully before re–submitting.

Most of the notations above are self–explanatory, but here are some additional hints for some of them:

• Time–limit Exceeded – This means that your program takes longer than 2 minutes to run. Your program should typically run in less than 2 minutes unless the problem specifies otherwise.
• Wrong Answer – Check computations.
• Incorrect Data File Name or Incorrect Class Name – Check problem statement for the correct name of the input file or class.
