BEFORE WE GET STARTED

Remember to register your attendance and complete session evaluations.

Session numbers are in your program.

Science Directors

- Dr. Michelle McGehee Biology
- Dr. Brian Anderson
 Chemistry
- Dr. David Bixler Physics

Purpose of UIL Exams

- to challenge students in the basic fundamental principles of science
- to promote learning in biology, chemistry, and physics
- to foster a sense of enthusiasm about advanced topics and courses in the sciences
- to help prepare students for the rigor of college level courses

The Science Contest

- Biology, Chemistry & Physics are all combined on one exam, with awards given for each subject and for overall score.
- The exam is both an individual and a team competition.
- The contest covers a broad base of knowledge, and models STEM degree requirements at most Universities.

Contest Structure

- 60 Multiple Choice Questions, which are divided into 20 of each topic Biology, Chemistry & Physics.
- Contestants are given 6 pts. for a correct answer, 0 pts. for unanswered questions, and lose 2 pts. for incorrect answers.
- The best possible answer is the correct answer.

A Few Details...

- At the state competition only, there is no limit on the number of answer choices given on a question, e.g. A through J, not just up to five answer options A through E.
- There is no restriction that numeric wrong answers must differ by ±5%
 - This will allow for more realistic pH problems in chemistry and will better model actual college-level exams.

Academic Meets 2021

Invitational Meets (practice - not governed by UIL)

A: Jan 8 – Feb 6 **B**: Feb 12 – Mar 13

- District Meet : Mar 22 27
- Regional Meet: Apr 16 17
- State Meet: April 29 May 1

Advancement/Qualification

- Competitions are separated by division (1A-6A)
- Each HS may enter 6 contestants at their district meet, where a minimum of 3 contestants constitutes a team.
- Advances to the next level:
 - 1st, 2nd & 3rd place overall scorers
 - Top scorer in each subject area
 - Top team by combined score*
 - One alternate in each category

*second place teams are eligible for possible advancement as a wildcard team

Things to keep in mind...

- The contest is <u>hard!</u>
- Top scores at the State Contest will be nearly perfect in each subject.
- There needs to be a clear cut winner and this will require a selection of hard questions on the contest.
- All schools divisions 1A 6A compete with the same contest, but the scores are only compared with schools in the same division.
- Do not be discouraged: there are benefits for all of the effort spent in preparing for the contest...

Some Contest Rules

- Contestants have up to 2 hours, but must remain for at least 30 minutes.
- You may use additional scratch paper provided by the contest director.
- Simple Scientific Calculators
 - Casio FX-260Solar
 - Sharp EL-501X
 - TI-30Xa
 - TI-30X II or TI-30X IIs

Biology Texts

Pearson's *Biology*, 10th or 11th edition, Campbell, et. al.

Biology Texts

MacMillan's *Life*, 11th edition, Sadava, et. al.

Online Biology Resources

- Learn Genetics University of Utah <u>http://learn.genetics.utah.edu/</u>
- Paul Anderson, Bozeman Science <u>http://www.bozemanscience.com/about/</u>
- Centers for Disease Control and Prevention <u>https://www.cdc.gov/</u>
- World Health Organization <u>http://www.who.int/</u>

Chemistry Texts

Chemistry: A Molecular Approach by Nivaldo Tro

Chemistry Texts

Chemical Principles

by Zumdahl (& Decoste) 5th, 6th, and 7th editions

Chemistry Texts

Chemistry by Whitten, Davis, Peck & Stanley

Online Chemistry Resources

University of Texas gchem site: https://gchem.cm.utexas.edu/

Chemistry LibreTexts (UC Davis) https://chem.libretexts.org/

Introductory Physics Texts

Conceptual Physical Science by Hewitt *Conceptual Physics* by Hewitt

College Physics Texts

(algebra/trigonometry)

Physics by Giancoli

College Physics by Serway & Vuille

College Physics by Young

University Physics Texts

(Calculus)

University Physics by Young and Freedman

Fundamentals of Physics

Physics for Scientists and Engineers by Serway and Jewett

Advanced Physics Texts

The Feynman Lectures on Physics by Feynman, Leighton & Sands

Physics Online Resources

OpenStax Physics Text

https://openstaxcollege.org/tex tbooks/college-physics

ComPadre Physlet Physics: http://www.compadre.org/physlets/

ComPadre Interactive Video Vignettes: <u>http://www.compadre.org/ivv/</u>

Astronomy Texts

Foundations of Astronomy by Seeds and Backman

21st Century Astronomy by Kay and Palen Openstax Astronomy

Physics Directed Study Text

QED: The Strange Theory of Light and Matter, by Richard Feynman

Not in C&CR, but is posted on UIL site.

FAQs on Texts

- Do I need to get these exact texts?
- Does it need to be the same edition?
- Does the text matter?
- What about other texts?
- Options:
 - Half-price books / Online book sellers
 - Interlibrary loan
 - Google "Free _____ textbook"

UIL Online Resources

- <u>http://www.uiltexas.org/academics</u>
 UIL Academics home page
- go to STEM > SCIENCE
 - Information from the Contest Directors will be posted here.
 - The new Physics directed study information is posted here.

Some Contest Strategies

- Watch units!
- Make diagrams with labels
- Look for order of magnitude answers
- Work backwards
- Problem identification...

Quick/Easy, Moderate or Hard

- Use these identifiers to work on speed
- Recognize when to skip or when to come back later

Coaches/Team Suggestions

- Goal setting for student morale is very, very important!
- Have students solve old contests UIL or TMSCA exams & help out other students.
- Practice contests as posted on UIL invitational meet site or attend TMSCA contests.
- If possible coordinate with other teachers to arrange for help when needed.
- Positive reinforcement & food are good motivators.

Specific Topics

Biology Chemistry Physics

Main Topics in Biology

- 1. Structure and Function
- 2. Cellular and Acellular Replication
- 3. Energy Transformations
- 4. Gene Expression
- 5. Genetics and Inheritance
- 6. Evolution
- 7. Origin and Diversity of Life
- 8. Ecology and the Environment
- 9. Basic Human Anatomy and Physiology

10. Diseases

Three Levels of Questions

- **1. Knowledge and Comprehension:** Advanced recall and identification of subject matter.
- **2. Application and Analysis:** Demonstration of quantitative reasoning using and generating graphs and data.
- **3. Synthesis and Evaluation:** Using information and prior content knowledge to formulate conclusions and generate hypotheses.

Biology Contest Structure

 Participants should expect questions from all topics on all exams.

- Approximately 75% of questions from levels 1 and 2; 25% from level 3.
- The relative level of difficulty will increase with each contest.

Topics in Chemistry

- 1. Fundamentals
- 2. Stoichiometry
- 3. Atomic Theory
- 4. Chemical Bonding and Structure
- 5. Gases
- 6. Liquids and Solids

- 7. Thermodynamics
- 8. Physical Equilibria
- 9. Chemical Equilibria
- 10. Acids and Bases
- **11**. Solubility Equilibria
- 12. Electrochemistry
- **13**. Chemical Kinetics

Questions in Chemistry

Each exam will have at least one question from each of the 13 topic areas.

Invitationals A & B

Generally these two exams have the easiest types of questions. Very straightforward information and calculations. Hint: if you see a definition question here, you're gonna need to know it later...

District

The questions go a little deeper into the subject matter. Some problems will be complex in nature but overall, this is a notch down in difficulty from the regional and state exams. Some problems present a situation where the pathway to the answer is not immediately apparent.

Regional and State

Problems will be more complex than on previous exams. More quantitative problems, with multi-step calculations required to get to the answer. Equilibrium problems will require more algebra to solve them. Some problems are designed to take more time. Sometimes the approach to solving the problem is not obvious, and some critical thinking is involved before the problem can be solved.

The 20 questions in Physics

- There will be 3 directed study questions from "QED" by Richard Feynman.
- Variety of question types: conceptual, symbolic, and numeric questions. Most will be numerical.
- There is a range of difficulty on each contest and over the contest season.
- Problems that require vector operations expressed in unit vector notation & calculus will be included on the state contest to help better differentiate the scores for the top students.

"*Physics Reading Text*" Directed Study Questions

- Invitational A Chapter 1
- Invitational B Chapter 1
- District Chapter 2
- Regional Chapter 3
- State Chapter 4

- Physics Questions P1 P3 will always be from the reading material. This year that is from "QED" by Richard Feynman.
- **Physics Question P4** will always be from the field of Astronomy.
- Physics Question P5 will always be about Measurement/Dimensional Analysis/Significant Figures/Order of Magnitude.
- **Physics Question P6** will always be about Uniformly Accelerated Motion.
- **Physics Question P7** will always be about Forces.
- **Physics Question P8** will always be about Work/Energy/Power/Momentum.
- **Physics Question P9** will always be about Circular and Rotational Motion/Equilibrium.

- **Physics Question P10** will always be about Waves/Sound/ Harmonic Motion.
- **Physics Question P11** will always be about Fluid Statics and Dynamics/ Thermodynamics.
- Physics Question P12 will always be about DC Circuits/Resistors/Capacitors.
- **Physics Question P13** will always be about Electric Fields and Forces/Electric Potential/Gauss' Law.
- **Physics Question P14** will always be about Magnetic Fields and Forces/Magnetic Materials/Ampere's Law.
- **Physics Question P15** will always be about Faraday's Law/Induction/EM Oscillation and Waves/AC Circuits.
- **Physics Question P16** will always be about Geometric Optics/Wave Optics.

- Physics Question P17 will always be about Modern Physics/Quantum Physics.
- Physics Question P18 will always be about Nuclear Physics/Particle Physics.
- **Physics Question P19** will always be a wildcard question from the topics traditionally covered in a Physics 1 course. That is from the topics covered in questions P5-P11.
- **Physics Question P20** will always be a wildcard question from the topics traditionally covered in a Physics 2 course. That is from the topics covered in questions P12-P18.
